Ferry

Feather is the soul of freedom. When feathers are captured as design inspiration, the designer takes its light form as the carrier of light. The high-quality aluminum secondary surface treatment makes the light scattering more quality, soft and comfortable, and the intelligent induction interaction mode makes the interaction between light and users more free and human.

Mirror

Mirror

American photographer Cody William Smith has created a series of beautiful images through specular reflection. The photographer uses a large round mirror buried in the soil or sand, and place it in different environments, including the sea or the desert, which uses the reflection of the mirror to give the viewer a multi-space image.

Inspired by this, we achieve another sense of balance by drawing in a way familiar to the public, giving the space a mirror that reflects bright light. The adjustable angle design also gives light more dynamic art.

String Music

String Music

Light is silent music, it can fill the space like music, and it can make people happy. In the string series, the shape of the string and the bow becomes the most concise design language, and the collision of the lines outlines the scene where the bow and string meet. This simple design concept gives the lighting more artistic atmosphere.

Dome

Dome

In the classical church, the contours of the dome and the minaret become an impressive art form.
We turn it into a simple and powerful design language that uses the current design to create the beauty of light filling through the dome.
In the religious sense, the church is a gift from the gods. The unique stretchable geometric chain design incorporates the design elements of the necklace, which is a gift for the home space.

Lakeside

The breeze wrinkled the surface of the lake, causing ripples. The light and shadow are pouring like water, and the ripples of the mirror are created by hand. The circle at the beginning of all things is expressed in a simple and pure design, which is a unique sense of beauty. Smart but not hustle and bustle, and elegant but not quiet, so that the warm emotions are relieved. Through the design, the elegant mood is conveyed and the space is given more imagination.

Magic Mirror

Minimalist design aesthetics and extreme light effect experience have been balanced and complemented in the magic mirror series. We explore the largest range of optical display and minimalist art expression, so that it can adapt to the optical needs of different spaces.
Magic mirror is a mirror to see art and optics.

Star Trails

The orbit of celestial bodies in the universe is the product of macro mechanics, following the most stable structure of nature and pure physical beauty.
The star orbit series takes the planet orbit as the design inspiration, and the coexistence of the planet and the orbit forms a stable and full of tension art picture and carrier. The secondary light source structure which can be adjusted separately gives another more human-oriented display form to optics.

Aperture

Aperture

The divergence of light is the design theme of the aperture. The polished mirror design and the gradient light source design at the bottom are used for the divergence of light. The intrinsic light source design makes the light source become part of the shape design and they present the charm of the light source art together.

Shadow

Shadow

Inspired by the architectural design, the architect Andrew described his grand theatre program as “The Lake Pavilion”. This is an ellipsoidal building situated in a nearly square large pool that forms the ultimate modern symmetrical aesthetics through the shadow of the water surface.

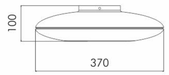

From the layered sense of metal and acrylic, the symmetrical structure is divided into two, which follows the minimalist design aesthetics. The light becomes the shadow of the lamp body, and the exquisite superb metal surface treatment process enables the overall effect to have the charm of light and shadow from gradual change to fusion.

Melody

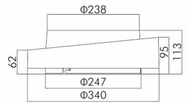

The cycle shatters and splits the original beauty of the whole, which is reorganized at the golden ratio and, brings an extended visual aesthetic feeling. The unique beveled design creates a distinct melody sense.
